

Screen reader for browser

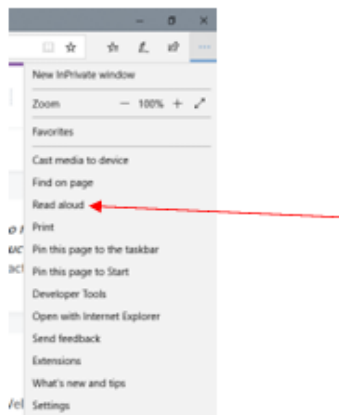

Microsoft Edge

Edge has a built-in screen reader so there is no downloading or adding of extensions. To use a screen reader in Microsoft Edge:

1. Click on the 3 lateral buttons near the top right corner of the browser.

2. Select the "Read aloud" option from the menu

3. A new ribbon will appear under the search ribbon

4. To use this tool, click where you want it to read. It will start reading from anywhere you click. To pause the reading, click the play/pause button. You can also change the voice and the rate of reading within the "settings button". To exit reader mode, click the blue "X" beside the "setting button."
